PROFESSIONAL SUMMARY

Final-year Computer Engineering student with hands-on experience building full stack web applications, SaaS platforms, and AI-powered automation tools using Next.js, FastAPI, PostgreSQL, and LangChain. Built two end-to-end products integrating third-party APIs and local LLMs, and led technical initiatives across 200+ peers.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript

Frontend: Next.js, React.js, Tailwind CSS, HTML5, CSS3

Backend: FastAPI, Node.js, REST API design, JWT Auth, OAuth 2.0

Databases: PostgreSQL, SQL (schema design, indexing, query optimisation)

AI / Automation: LangChain, LangGraph, Ollama, AI Agents, Telegram Bot API, Gmail API, Slack API

Dev Tools: Git, GitHub, VS Code, Postman

EXPERIENCE

Full Stack Developer Intern · InternPro

May 2025 – Nov 2025

Onsite · Next.js, TypeScript, FastAPI, PostgreSQL, n8n, Tailwind CSS

- Developed InternPro's main business website and LMS platform, building course listing, enrollment flow, and student dashboard using Next.js and TypeScript.
- Built client-facing project deliverables including a logistics operations dashboard with role-based access control and an e-commerce admin panel with order management and Razorpay integration.
- Assisted in setting up n8n-based automation workflows for client onboarding and internal notification pipelines.
- Maintained Git feature-branch workflow across projects and participated in weekly code reviews.

PROJECTS

TaskOrbits Next.js · TypeScript · FastAPI · PostgreSQL · LangChain · LangGraph · Ollama · Telegram/Gmail/Slack APIs

- Designed and built an AI-powered productivity platform that auto-ingests tasks from Telegram, Gmail, and Slack and converts them into structured, prioritised tasks on a unified board.
- Implemented a LangChain-based multi-step AI agent pipeline that classifies messages by urgency, extracts action items, and assigns due dates — reducing manual task-entry overhead for personal and team use.
- Backend built with FastAPI (async endpoints, JWT auth, normalised PostgreSQL schema); inference hosted locally via Ollama. Frontend in Next.js with drag-and-drop Kanban board.
- Won 1st Prize at InnoSpark (TECHKNOWLEDGE, SSIT) and presented at NCITE-2026 national conference (IEEE format).

FarmPulse Next.js · TypeScript · FastAPI · PostgreSQL · LangGraph · Ollama · Tailwind CSS

- Built an AI-assisted agricultural portal featuring a crop recommendation engine trained on regional soil, rainfall, and seasonal data for major Indian states.
- Implemented a LangGraph multi-agent conversational assistant — one agent routes queries, another fetches live mandi prices from public APIs (data.gov.in), a third generates crop-specific guidance via a local LLM.

EDUCATION

B.Tech – Computer Engineering

Nov 2022 – Jun 2026 (Expected)

Swaminarayan Siddhanta Institute of Technology, Nagpur · Aggregate: 63% · Relevant: DSA, OS, DBMS, Web Tech, AI/ML

HSC (XII) – Science · SFS Junior College, Nagpur

2021 · 73%

SSC (X) · Guru Nanak High School, Nagpur

2019 · 71%

LEADERSHIP & ACHIEVEMENTS

- President – CS Department Forum, SSIT: Represents 200+ students; drives tech initiatives, guest lectures, and inter-college collaborations.
- Head Organiser – Annual Technical Fest (3 consecutive years): Planned coding contests, AI workshops, and project exhibitions for 500+ attendees per edition.
- Founder – College Coding Club: Grew active membership from zero; runs bi-weekly competitive programming sessions and peer code-review circles.
- 1st Prize – Inter-College Project Competition (InnoSpark): Recognised for outstanding full-stack + AI project among 30+ competing teams.

CERTIFICATIONS

- The Complete Web Development Bootcamp – Udemy (2024)
- AI Agents & Automation Workshop – Hands-on training in agentic AI design patterns and LangChain pipelines.
- Hackathon Participant – Multiple national-level events focused on full stack and AI application development.
